Dobies Motion Picture and Musical Aggregation

The motion picture and musical entertainment held in McCue's hall on Monday and Tuesday evening last, turned out as advertised and was attended by a large number of people, who were well pleased with the evening's enjoyment of music and motion pictures.

The pictures were thrown on the screen with a very strong light thus giving the audience a good view of a variety of pictures including comics, love scenes, Indian war dances, etc.

The following six instruments were played by Mr. Dowie, and was quite a complicated arrangement. Piano, base violin, 1st violin, 2nd violin, harp and cornet, which altogether furnished quite an orchestra.

These instruments were set on a frame, with pedals underneath, and from this there were wires connecting to the several instruments, which brought forth the strains of music.

We might say by past remarks that this is the only motion picture show shown in Bowden that pulled through without a fault of any kind.

Bowden Orange Lodge

The usual monthly meeting of the Bowden Orange Lodge was held on Tuesday night. There was a good attendance and some important business was transacted. The Committee reported that the Order for a new Banner had been placed with a Toronto firm and the Banner would be here in time for the County Meeting, which meets in Bowden on June 14 and which promises to be a most important gathering. A hearty invitation was received from the Orange Lodge in Wetaskiwan, for Bowden Lodge to unite with them in the July 12 Celebration, and it was unanimously agreed to accept the invitation.

Church News METHODIST

A special service will be held in the Methodist Church, Bowden, next Sunday evening, May 12th at 7.30, in celebration of "Mothers day". Rev. F. E. Davies will preach. Subject: "The value of sweet memories." Mrs. Davies and Mr. Hunter will sing a duet entitled "Can a boy forget his mother." The congregational singing will be led by the church orchestra. Bright Hearty Service. Mothers specially invited.

The Sacrament of the Lords Supper will be administered at the close of the Service. There will also be Divine Service held in Nisbet Schoolhouse at 2.30 in the afternoon.

Fine Weather for Crops

During the greater part of last week, especially on Wednesday and Thursday last, the ground got a thorough soaking from a heavy rainfall, along with snow, and if anything was wanting to ensure a bumper crop this coming fall, the rains of the past week have fulfilled the necessities.

The grain that has been sown will get a fine start, and the grain that has yet to be sown will have the special advantage of a moist top soil.

Practically all seeding operations on the part of the farmer has come to an end, and with the continuous sunshine which we are now having, should in no way, with the exception of hail or frost hinder a bumper harvest for this fall.

Spring has opened in the course of due time, might say a little earlier than usual, and with the amount of moisture we now have in the ground, there is practically enough to carry the crops through to maturity should we have no more rainfall this season.

A Sporting Review

We are glad to see that the Athlete proclivities of the "boys" are beginning to come to the fore. We observed with much pleasure the way Charlie Ridgway put the kibosh on Howard Strauk's pitching the other night. Also among the veterans there seems to be an improvement. "Doc" Buchanan, very seldom fanned, but doesn't seem to have got the knack of giving the ball a good wallop. Now boys, we've got men of the right stuff here, we've got the enthusiasm and we can get the money. Why not start right in and have a good ball club? Olds have already got their bunch on their feet, and surely we are not going to let them say that Bowden is behind.

Football seems to have dropped into oblivion the last week or so, owing to the bad weather I suppose. However, a good practice game was played last Tuesday, and on Friday, I am told that sides will be chosen, and, in all probability I shall have the pleasure of seeing a good game. From what I hear of the local footballers, a match will be arranged with Olds or Innisfail on the "24th." This is not definitely decided upon yet, but hope it will be pulled off. If it is, it will undoubtedly give football a great stimulus in Bowden.

Two new players have drifted in and both on their present form, should prove valuable additions to the club.

By SPORTY

3 DAD C HERE'S TO YOU!

"We happened in a home the other night, and over the parlor door saw the legend worked in letters of red: 'What is Home without a Mother!'" Across the room was another brief: "God bless our Home."

Now, what's the matter with "GOD BLESS OUR DAD!" He gets up early, lights the fire, boils an egg, wipes off the dew of the lawn with his boots while many a mother is sleeping. He makes the weekly hand-out for the butcher, the grocer, the milkman and the baker, and his little pile is badly worn before he has been home an hour.

If there is a noise in the night Dad is kicked in the back and made to go down stairs and find the burglar and kill him. Mother darns the socks, but Dad bought the socks in the first place, and the needle and yarn afterwards. Mother does up the fruit; Dad bought it all, and jars and sugar cost like the mischief.

Dad buys the chickens for Sunday dinner and serves them himself and draws the neck from the ruins after everyone else has been served.

"What is home without a mother?" Yes, that's all right; but WHAT IS HOME WITHOUT A FATHER? Ten chances to one it's a boarding house. Father is under the sod, and the landlady is a widow. Dad here's to you—you have got your faults—you may have lots of them—but you are all right, and we will miss you when you are gone.

HAUNTED

BY
GERTRUDE WARDEN

Author of "Dancing Leaves,"
"The Sentimental Boy," "The
Crime of Monte Carlo,"
etc., etc.

WARD, LOCK & CO., LIMITED
London, Melbourne and Toronto

(Continued.)

"I suppose you are very fond of this Lady Anne Daubeney, Mrs. Anning?" he suggested. "I understand you have seen her grow up in the neighbourhood?"

"She's a beautiful young lady, to be sure," Mrs. Anning said, as she arranged the table. "But she's more like a queen than an ordinary person. She does a lot of good on the quiet. At night you often catch her taking food and dainties to cottagers who are ill; but she gets angry if you speak of it. She never takes notice of that sweet little Teddy Jessop, and I'm sure the child's like a picture. I don't believe Lady Anne really likes the Jessops, between you and me, sir. Susan, she's a fine girl, but pert, and Teddy is the son of Susan's sister Julia, that died when he was a few months old, leaving the child in Grammer Jessop's care. Julia was in service in London, and she swore the poor babe was born in wedlock. But Jessop he's always called, whatever his father's name was; and maybe that's why Lady Anne, who's very strict and particular, doesn't like him."

"It would be hard to think that was the child's fault," said Harry.

"Lady Anne is a little very bit hard, sir. But it was her misfortunes, doubtless, made her so. One mustn't say a word against her to my John, though, nor yet to his brother George. Lady Anne is everything to them; no one else has a right to live, according to them, and I durstn't find any fault in her while they're about! As to poor old Stephen Jessop, I've heard he won't eat a morsel that she doesn't serve him with her own hands. And he was but a villager and she a lady of title! She waits upon him, they tell me, like as if he was her father."

"That doesn't sound hard," observed Harry.

"It doesn't indeed," Mrs. Anning agreed. "But lord, sir, she's a puzzle—Lady Anne—if I may make so bold as to say so!"

Before he had left the farm for his morning walk, Harry had an unexpected visitor.

In her black and white frock and her beflowered hat, and her pointed French boots, Mlle. Lisette Dupont came tripping over the old Elizabethan bridge, and, lifting her skirts very high, stepped daintily across the farmyard to the gate before the grass plot to the Manor House.

"My word! Here's a smart young person!" exclaimed the farmer's wife, meeting Harry in the hall. "It must be you, sir, she's after; not my steady old John, I do hope!"

"It is zat Meester Woort leev' 'ere?" the young lady asked as she saw Mrs. Anning staring at her from the porch. "I wish to see 'im, if it please you, madame!"

Pimples So Bad He Was Ashamed

Tried Everything but Did It No Good.
One Box of Cuticura Ointment
Took Pimples Away.

"About seven years ago pimples broke out all over my face and neck. When they would first come out they would be big and red, then after a while they would turn white, and matter would come out. Sometimes they would itch so I could hardly sleep. I was ashamed to go down street, my face looked so bad. I went to several doctors and got medicine, which did me no good, and bought ointment, salves and patent medicines, but none of them would cure my face and neck. A friend advised me to try Cuticura Ointment. I got one box, and it took the pimples away before I had it all used up. I can say it is a wonderful remedy. Any sufferer who has pimples should use Cuticura Ointment if they want a sure cure. I never had any soap equal to Cuticura Soap." (Signed) Aviner Mathers, Parkhill, Ont., Dec. 24, 1910.

Sores All Over Baby's Body

"When my baby boy was six months old, his body was completely covered with large sores that seemed to itch and burn, and cause terrible suffering. The eruption began in pimples which would open and run, making large sores. His hair came out and finer hairs felt off, and the sores were over the entire body, causing little or no sleep for baby or myself. Great pains would come off when I removed his shirt. We tried a great many remedies but nothing would help him, till a friend induced me to try Cuticura Soap and Ointment. I used the Cuticura Soap and Ointment but a short time before I could see that he was improving, and in six weeks' time he was entirely cured. He had suffered about six weeks before we tried the Cuticura Soap and Ointment, although we had tried several other things and doctors too. I think the Cuticura Remedies will do all that is claimed for them, and a great deal more." (Signed) Mrs. Noble Tubman, Dodson, Mont., Jan. 28, 1911.

Cuticura Soap and Ointment sold by druggists and dealers everywhere. Send to Potter Drug & Chem. Corp., 66 Columbus Ave., Boston, U. S. A., for a liberal free sample of each, with 22-p. booklet.

W. N. U. 89

"It is you, sir," whispered the farmer's wife, putting her head into the dining-room, where Harry was lighting a cigarette. "Shall I show her in?"

"By all means,"
If Lisette was not the rose, at least she had the honour of dwelling near it; and anyone who could bring him news of Lodgers Abbey and its mistress was welcome to Harry.

Lisette entered with a pretty affection of maidenly confusion. Then she mysteriously shut the door after her.

"You have been so kind, monsieur, yesterday," she began in French, "that I regard you as my friend, and I supplicate you to give me your counsel."

"Sit down, Mlle. Dupont," Harry said, offering her a chair. "Have you come over for that?"

"Not precisely, monsieur. I have something to give you. But I am bewildered, troubled. Monsieur cannot conceive what a strange, what a terrible house I have entered. It is full, but full of mysteries!"

"What sort of mysteries?"

"First there is the Lady Anne. Figure to yourself, monsieur, before I see my dear mother, an ugly old woman with black hair, who appears not to understand French or English or anything; she looks at me from the head to the feet, and then I see a laugh in her black eyes. She shows me to a room full of china and pictures and embroideries. And there by the window is a lady as tall as you, monsieur, a glances, all in white, who stares at me with eyes full of blue light, as when you throw salt in the fire."

"Who are you?" she says to me in a singular voice that is low and like running water.

"I tell her quickly who I am and for what I have come, and all that I can do—fine needlework, and dress-making, and hairdressing. And she leaves off staring at me, and looks out into the garden and appears to be listening for something; but she listens not to me!"

"At last, she remembers me and looks down at me again."

"You are too young," she says in French, "much too young. You shall see your mother for a day or two and then you must find another situation."

"That is all, monsieur."

"Then she rings a bell and says to the black-haired woman, who is Spanish and called Maria—"

"Take Lisette to her mother, Virginie."

"My mother, she embraces me fondly; but when I cry and tell her do not like her cold English milady, she says I am wrong, and that I am dressed much too well, and that I should have worn my hair flat, and an old bonnet, to please Lady Anne, as they call her."

"If you are very good and quiet, and dress in my old gowns, you may perhaps stay," my mother says. "Milady pays her servants very well, and I want to have you near me. I told her you were nearly thirty, and not pretty."

"But, monsieur, it is not my fault that I am only twenty-two and not precisely ugly, is it?"

"Certainly not, mademoiselle. Pray go on."

"Afterwards my mother tells me my duties. I should have thirty pounds a year; my mother has fifty, but she is an excellent cook. But what a life! Never, no, never must I go outside the walls of the Abbey grounds, nor must I make any friends or see anyone! For church there is the little chapel to the Abbey, but I must only go into it when I am permitted. I must never even enter the two rooms which are next to the chapel. I must go outside the house when the priest arrives, and enter the chapel from the grounds!"

"That is not all."

"There is a person in the house of the greatest importance, whom I must never offend. Sometimes, I am told, he may send for me and tease me until I am half mad, but I must not answer him. But if he does not send for me (and it will be always Lady Anne who brings me the message) I must never enter his room."

"You will imagine, monsieur, that it is a young and handsome millard who rules like this in this house of women?"

"But no; it is an old, old man, much more than seventy, a man of the most common, rough, ordinary kind, who speaks, they tell me, like the peasants here, and who is the husband of the little old woman who minds the lodge. He had a paralytic attack many years ago, and he has never left his room since that time. Only Lady Anne and Maria, and an old mad person I am told to take no notice of, enter the room of this Stephen Jessop. My mother, who has been there four years, has not even seen him! Monsieur, I have been more clever than she, for I have seen him, and that is why I am 'eing sent away!'"

"I served milady at lunch. She was alone, as she always is, but she ate almost nothing."

"Then she rose, put some food on a tray, and some wine, and walked away with it, looking so great and stately, she frightened me."

"She goes to her room, but first she takes a key from her pocket and opens the door. She crosses her room and then puts another key in the door of the inner room."

"This old Stephen is locked in! I follow, too curious to stop, I am very quiet, and pretend to want to help milady, and carry the tray, and pen the doors."

(To be Continued)

WIFE OF THE P.M. TALKS TO WOMEN

Tells What Dodd's Kidney Pills Did for Her.

She Suffered for Two Years and Found a Cure for all Her Troubles in a Single Box.

Lower Caraqueet, Gloucester, N. B. (Special).—Mrs. Jos. O. Chiasson, wife of the police magistrate here, who for two years has been practically an invalid, is again in the best of health, and she is telling her friends how quick and complete was the cure when she took Dodd's Kidney Pills.

"My illness," Mrs. Chiasson says, "was caused by a strain, and for two years I was a sufferer. My back ached, I was always tired and nervous, there were dark circles under my eyes and after sleeping I had a bitter taste in my mouth."

"I had a pressure and sharp pain on the top of my head. I was always thirsty and my skin had a harsh, dry feeling. I was often dizzy, I perspired easily and my perspiration had an unpleasant odor."

"Almost from the first dose Dodd's Kidney Pills helped me and by the time I had finished the first box I was a well woman."

Mrs. Chiasson's symptoms showed that the trouble was her kidneys. That's why Dodd's Kidney Pills cured her so quickly.

There are 2400 adiens (mostly Poles) in Scottish mines.

Remarkable Experiment.

Sir W. Ramsey believes that something will be done in the nature of not raising coal at all, but letting it lie underground, burning it there, and taking off the gases. He has been in communication with a large colliery proprietor, and that gentleman is making the experiment. It will be started on a very small scale.

Americans the Biggest Meat-Eaters.

Despite the fact that the census reports show that Americans are steadily drifting towards vegetarianism, they are still (says the famli Doctor), the greatest meat eaters in the world. Their meat costs every year one hundred million dollars more than their vegetables, including imported vegetable foods. In the aggregate American pay every year about \$2,250,000,000 for food.

Ask for Minard's and take no other.

Struggling Author: "This world will not recognize all I have done until after my death."

Friend (consoling): "Well, I wouldn't worry. You'd be beyond injury then."

His Arch Look.

George M. Cohan, the comedian, was talking about men's clothes.

"Blank," said Mr Cohan, referring to a certain actor. "Blank is a well-dressed chap. Blank, I warrant, you, will look superb in his new Easter clothes in the Easter Sunday parade on Fifth avenue."

"Blank would look well enough, I admit," said a tragedian, only, hang it he is bow-legged."

"Oh, but that," said Mr Cohan, "that is what gives him his arch look."

The first bread was made by the Greeks and the first windmill by the Saracens

Rather Grateful.

"Do you think it possible to love your enemies?"

"Not exactly," replied Miss Cayenne, "yet many of us ought to feel rather grateful to our enemies, as the only people who take a real interest in us."

The Origin Of Diamonds.

Von Bolton thinks that diamonds are formed in nature by the action of metal vapors, such as iron or magnesium, on carbon dioxide. He has succeeded in making microscopic diamonds by the action of mercury vapor on carbon.

A MOTHER'S PRAISE OF BABY'S OWN TABLETS

Mrs. Wm. Sullivan, Main River, N. B., says: "Up to the time my baby was three months old it cried almost continually day and night. I tried many things but got nothing to help it until a neighbor advised Baby's Own Tablets. I got a box of these and there was a change almost after the first dose and in a short time the child was in the best of health, and is now a big, fat, good-natured baby. I am now never without the Tablets in the house and recommend them to other mothers." The Tablets are sold by medicine dealers or by mail at 25 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont.

A TREATISE on the Horse— FREE!

We offer you free this book that tells you all about horse diseases and how to cure them. Call for it at your local druggist or write us.

KENDALL'S SPAVIN CURE

Is invaluable. It cures Spavin, Curb, Splint, Ringbone or any other lameness, quickly and safely at small expense. Read what Leo Cadigan, of Ramothmore, Ont., says: "I used your Spavin Cure on a horse that had Ringbone, and it cured him in four weeks' time."

And Mr. Frank French, of Blanche, Que., writes: "Please send me your valuable Treatise on horse diseases. I have used three bottles of your Spavin Cure this season with great success and find it a sure cure for Spavin, Splints and all kinds of sores on horses."

Kendall's Spavin Cure is sold at the uniform price of \$1.00 a bottle, or 6 bottles for \$5.00. If you cannot get it or our free book at your local druggist, write us.

Murine Eye Remedy is Aseptic, Tastes Good and Safe.
Murine Eye Remedy Co., Chicago

Don't let repairs eat up your profits

Whether they represent actual cash outlay, or only the time of yourself and your help, repairs are waste just the same. When you make an improvement—no matter how small its cost may be—let it be permanent. Then it is a real investment, something on which you can realize in cash should you decide to sell your property; and something that will pay you constant dividends in convenience, sightliness and comfort as long as the farm remains your own.

Concrete Improvements Are Permanent

They last as long as the very hills themselves. They do not require experts to build them. Their first cost, in most cases, is no more than for inferior materials.

Aren't you interested in the subject of permanent, modern farm improvements?

Then write for the book that describes hundreds of them—

"WHAT THE FARMER CAN DO WITH CONCRETE"

It isn't a Catalogue. Every one of its 160 handsomely illustrated pages is interesting and instructive. They tell how to mix concrete, how to place it, what can be done with it. The book was printed to sell for 50 cents, but we have a copy for you, free.

Your name and address on a postal will bring this book

TO YOU ABSOLUTELY FREE

Mail the postcard to-day. The book will come to you by return mail.

May 24. For further particulars
look for posters which will be out
in a week or two.

Hail Insurance—H. E. Shen-
field is now in a position to furnish
particulars and rates charged on the
new system of Hail Insurance.
Those interested are invited to call
at his office.

We quote the following local
which is taken from one of the
Southern Alberta Newspapers, not
that it is of any interest whatever
to our citizens, but more from the
peculiar way in which it is wor-
ded, and at the same time won-
dering how many wives this
gentlemen might have.

Mr. and Mrs. O. S. Chapman and
wife were here from Calgary on
Sunday.

The Bowden Board of Trade are
making all arrangements to have
several thousand letterheads printed,
being as follows: an outline
map of Alberta, showing the prin-
cipal towns on the C. and E. line,
and in which Bowden is included
along with a photograph of the
town and some very interesting
literature of Bowden and district.
This will no doubt be of great de-
mand by our local business men,
who will be wanting letterheads,
and in this way they will not only
advertise their own business but
matters of interest pertaining to
the town and district. Envelopes
will no doubt be printed as well,
for use with the letterheads.

Saskatchewan Members
of the Board of Control of
the Seventh International
Dry-Farming Congress

LETHBRIDGE, Alberta, May
1. Twenty-five representative
men of Saskatchewan have been
designated by Hon. W. R. Mother-
well, Minister of Agriculture, as
representatives of that province on
the Canadian Board of Control of
the Seventh International Dry-
farming Congress, to be held in
this city, October 21 to 26.

These representatives are chosen
from among the most progressive
farmers and men interested in the
agricultural development of this
section of Western Canada, and
they are expected to interest them-
selves in stimulating interest in the
Congress, and in procuring ex-
hibits of the best products raised
in their locality, with a view to
showing the agricultural possi-
bilities of that section.

The appointments are as follows:

E. J. Meileike, Dundrun.
George Langley, Regina.
O. E. Andreason, Humboldt.
J. D. Stewart, Arcola.
Conrad Stueck, Abernethy.
Mathew Snow, Wolsely.
J. J. Scully, superintendent, West-
ern Division Canadian Pacific
Railway, Moose Jaw.
C. D. Fisher, superintendent, Can-
adian Northern Railway, Saskatoon.
W. B. Cronk, Representative
Grand Trunk Railway, Melville.
John A. Mooney, Regina.
A. McD. Thompson, Prince Albert.
George Campbell, Ellsboro.
Willial Osler, Ellsboro.
H. O. Partridge, Lintalva.
Hugh McKellar, Moose Jaw.
John Millar, Indian Head.
Fred W. Green, Moose Jaw.
William Abbott, Maple Creek.
Joseph Dixon, Maple Creek.
Robert Casewell, Regina.
J. W. Brown, Regina.
Norman Ross, superintendent ex-
periment Farm, Indian Head.
R. J. Phil, Moosomin.
Frank Sheppard, Weyburn.

Small Pay for those who go down to the Sea in Ships

Liverpool, April 27. The Liver-
pool branch of the seamen's and
firemen's union adopted a resolu-
tion today that on and after
April 29 the men will refuse to sail
on any steamers unless represent-
atives of the union are allowed to
inspect the lifeboats. The union
also demands that the seamen's
wages shall be increased to \$22 a
month, and the firemen's wages to
\$24 a month.

charges.

Olds News

Dr. Ira Paisley returned from
Chicago Saturday.

Miss Corn Powell is visiting
friends and relatives in Olds this
week.

Mrs. Walter S. Reed and family
left for Edmonton on the 7th.

Mr. Tom Buckham of Edmon-
ton was transacting business in
town this week.

W. H. D. Witzel who has been
a familiar personage around the
Post Office for several years, left
for Edmonton Sunday. Billie will
be missed as he was always at
your service. Miss Ethel Silver-
thorn has taken his place.

Mr. T. B. Miller of Red Deer
manager of the Laurentia Milk
Plant in Alberta was in Olds
Tuesday. Mr. Miller is very en-
thusiastic over the outlook for his
Company. The Farmers are buy-
ing all the cows they can get a
hold of. There has been three car-
loads of pure bred milk cows ship-
ped in to the Olds Dist. In the
past two months, Mr. Miller says
the machinery for the Olds Plant
should be here shortly and assured
us that this would be one of the
largest and best equipped in the
Province. Work has been started
to enlarge the present creamery
building, which is inadequate.

Seven hundred gallons of milk
was shipped to Calgary on the 7th
from this point.

Rev. W. G. Prown of Red Deer
gave an interesting address in the
Presbyterian church Wednesday
evening, his subject was, Shake-
spere.

On April 24th, at 8.30 p. m., a
very pretty wedding took place at
the home of Mr. Norman Ross,
when his sister, Miss Effie Ross,
became the wife of Mr. Lyiel Reed.
The bride who was given away by
her prother, wore a charming
gown of white lace with a large
white picture hat, surmounted with
lovely plumes. She carried an ex-
quisite bouquet of white roses, lilies
of the valley and maidenhair fern.
Miss Apenbury, who acted as
bridesmaid, wore a gown of pale
mauve, with a large black picture
hat trimmed with roses and lace.
Her flowers were pink roses.
Miss Helen Miller was a pretty
little flower girl in white and blue,
carrying a basket of pink carnations.
Mr. Walter Ross supported
the groom. The ceremony was
performed by the Rev. R. J. Wil-
son. The house was perfectly
decorated with pink and white
roses and carnations. The same
color scheme making the supper-
table very attractive. Mr. and
Mrs. Reed went on a short trip,
the bride travelling in a grey tail-
ored suit with small bonnet hat to
match. They are residing at 3549
third ave." (Vancouver World).

Mr. Reed spent most of his boy-
hood days at Olds and was with
the Edmonton Journal for some
time. He has the best wishes of
his many friends here.

Mr. Bert Morphey had the mis-
fortune to get a nasty kick in the
face by a horse Monday morning.
Dr. Hareman dressed the wound
and reported the patient doing
nicely.

Robert and John Burris who
went to Florida a few weeks ago
are back in Olds.

W. J. Jackson of Strathcona is
in Olds this week.

Burt Clark was in Calgary
Thursday.

Inspector of Schools, F. S.
Ainsworth traded his half section
of land west of Olds for the Gam-
mon property last week.

We understand the Scott Bros.
have bought the McArthur prop-
erty in the north east part of
town.

Herb Simmons and Judson Har-
ris were Didsbury visitors this
week.

The "Made in Canada Special"
will be in Olds Thursday May 13th
this will no doubt be very instruc-
tive. 7 p. m. to 11 p. m.

Will Boost Manu- facturers

Calgary, Alta.—With reference
to the benefits likely to be realized
by Western Canada from the open-
ing of the Panama Canal, E. N.
Weelox, the well known tractor
manufacturer of this city, says:
"I am of the agricultural subju-
gation of this and other Western
provinces can be brought about
only by power farming. We think
we have an artical that cannot be
surprised, but we could hardly af-
ford to come here unless we can
get cheap steel, and this we ex-
pect to do from Birmingham by
way of Mobile and the canal, and
then water transportation to Van-
couver. The canal played its part
in bringing us here, as it will with
many other manufacturing plants
that will follow us."

A Prosperous American

Lethbridge, Alta.—Among the
most successful of the large ran-
ches of the Lethbridge district is
that of G. W. Wheatley, an Am-
erican from Spokane. Mr.
Wheatley says he now has up-
wards of 1000 acres seeded to
wheat; and in view of favorable
weather conditions he looks for-
ward to a heavy yield the coming
season. Special attention is now
being directed among Lethbridge
citizens to the matter of civic im-
provements especially in the way
of beautifying public squares and
vacant lots in and near the central
part of the city; and an effort is
being made to enlist the coopera-
tion of the Women's Civic club in
this movement. Included in the
list of new buildings for Leth-
bridge this year are a Labor
Temple, a Masonic structure, at
least two churches and many large
and small residences.

Wanted to Do The Right Thing.

A woman in Trenton, N.J., who has been having a lot of trouble with her domestic help, was obliged recently to accept the temporary service of a raw recruit in the shape of an Irish girl just landed in this country.

After a preliminary survey of the girl and a dejected sigh, the lady of the house asked:—

"What can you do?"

"Shure, most anything at all, mum," responded the newcomer.

The lady of the house glanced about the room. There was every thing to be done. "Could you fill the lamps?" she finally ventured to ask.

"Shure, I kin fill the lamps!" exclaimed the enthusiastic Celt, as she grabbed one and started out. Then, with the air of one wishing above all things to suit the possible caprices of a new employer, she paused to query: "An' is it gas or oil ye'd be wantin' thim filled with?"

Expansion And Contraction.

A teacher in a New Jersey educational institution had been trying to make clear to her pupils the principle in physics that heat expands and cold contracts. The rule was discussed in its various aspects and bearings, and finally the teacher said:—

"William Brown, suppose you give me a good example of the rule."

"Well, ma'am," answered William, "in summer, when it is hot, the days are longer, and in winter, when it is cold, the days are shorter."

Hard and soft corns both yield to Holloway's Corn Cure, which is entirely safe to use, and certain and satisfactory in its action.

How Time Changes Words.

"Owe used to mean 'to own, to possess.'"

Any boy was once a knave. Idiot once upon a time was applied to a private person who took part in public life. It is a Greek word, and the Greeks believed that all such persons were foolish; so it has come to mean a foolish person.

Hussy now characterizes an impudent woman, while originally it was a short word, meaning housewife. A villain was once a slave attached to a farm.

Tyrant once applied to any prince or governor.

"Infant was once synonymous with 'speechless.'—Kansas City Times.

Worms sap the strength and undermine the vitality of children. Strengthen them by using Mother's Worm Exterminator to drive out the parasites.

Preparing for the Future.

"He drinks heavily."
"I know it."
"He gambles."
"I am going to marry him to reform him."

"My girl, listen to me. Try one experiment before you do that."
"What experiment?"
"Take in a week's washing to do, and see how you will like it."

Keep Minard's Liniment in the house.

Mrs. Wombat, I understand you have been happily married for twenty-five years."

"Yes."
"To one husband?"

"Yes."

"Would you consider an offer to appear in vaudeville?"

"No; I don't believe in making a sensation out of such matters."—Pittsburgh Post.

Alaskan Mosquitoes.

Mosquitoes in the icebound northern country are a plague beyond relief. They come to life about the middle of May, before the ground is thawed out and while many feet of ice still covers the lakes and all but the swiftest rivers. Stagnant, sun-heated water is not in the least necessary. They breed in the glaciers wherever a bit of earth or manure has melted a little pool. Their wrigglers are seen in running ice water. By the 1st of June it is uncomfortable to sleep without protection, and from that time on until September, when the first frosts have benumbed them, especially during the warm, rainy season of July and August, they become a never-ceasing scourge, swarming in thousands. The Alaskan mosquito is small, brown, silent, and very much in earnest. He never sings a warning nor fools about selecting a spot to taste, but, says a sufferer, comes in a bee-line with his probe and gets in to action. Every inch of your clothing is industriously bored, so that you look like an animated brown cocoon, and the slightest exposed spot on wrist or neck is promptly set on fire. I experimented with a small hole in my glove. After the first mosquito had found the opening others came in quick succession to the spot. He left some microscopic "kind lady and no dog" sign there. If I killed the first and left his carcass it served as a warning not at all. The others came the faster, and the more I killed the more eager the survivors became, perching quite unmoved on the remains of their confederates.

Minard's Liniment used by Physicians.

Academy For Dogs.

An enterprising person in Paris has opened an academy for dogs. The duration of the curriculum is a minimum four months, when presumably a pass degree is obtained. For honors the time spent with class fees is somewhat heavy. The animals received at the school, which has above its portals in letters of gold the words "Academie pour Chiens," are taught a thousand and one graceful tricks, and on leaving they take with them their diploma signed and sealed. Some of the alumni, we read, have already obtained a deserved reputation.

Wretched from Asthma. Strength of body and vigor of mind are inevitably impaired by the visitation of asthma. Who can live under the cloud of recurring attacks and keep body and mind at their full efficiency? Dr. J. D. Kellogg's Asthma Remedy dispels the cloud by removing the cause. It does relieve. It does restore the sufferer to normal bodily trim and mental happiness.

Really Rainproof.

In Lapland garments made of reindeer wool are famous for their moisture-repelling property as well as for their warmth. The hair, unlike that of many animals, is not hollow throughout its length, but is divided into watertight cells filled with air, which appears to be under compression, so that when the garments are placed in water the hair, or wool, swells without breaking, and the wearer is buoyed up, and does not really sink if he falls overboard. Such garments are in common use among the Swedes and Norwegians.

Rather Useless.

Kind Lady—And what does your father do?
Urchin—Ain't got no father—only a stepfather.

Kind Lady—Well, what does your stepfather do?
Urchin—He ain't done nothin' since we've had him.

Health And Success

are such intimate relations that no one can be expected to be well acquainted with success who does not keep good hold on health. Most serious sicknesses start in minor troubles of the digestive organs. Thousands know by actual experience that health and strength—and therefore success—

Are Increased By Use of

Beecham's Pills in time, and before minor troubles become deep-seated and lasting. This famous family remedy will clear your system, regulate your bowels, stimulate your liver, tone your stomach. Then your food will properly nourish you and enrich your blood. You will be healthy enough to resist disease—strong enough to take due advantage of opportunity after taking, as needed,

Distribution Of Sexes.

A German economist, Herr Gullischambarof, has recently made some calculations concerning the population of the world, says the Globe, and he arrives at the conclusion that there are 1,700,000,000 souls. From the point of view of sex, he possesses some data concerning 1,038,000,000 and he finds that of these 521,700,000 as males and 516,300,000 are females, consequently on the aggregate, the professor concludes, there are 990 females for every thousand men. Herr Gullischambarof finds the same distribution beyond Europe. In Africa women preponderate, and the ratio is greater than that of Europe, for in the black continent there are 1,045 females for every thousand men, compared with 1,027 women to the same number in Europe.

In the three other divisions of the world women are in the minority. In America they count for every thousand men 964 women, in Asia 961, and in Australia 937. In Africa that part were the women population is greatest in Uganda, where for a thousand men they count no fewer than 1467 women. The female population shows weakness in the Western and North-Western States of Eastern Australia. The greatest paucity of women it to be found in Alaska and the Malay States, where for 1000 men we find only 391 and 389 women respectively.

A Power of its Own.—Dr. Thomas' Electric Oil has a subtle power of its own that other oils cannot pretend to, though there are many pretenders. All who have used it know this and keep it by them as the most valuable liniment available. Its uses are innumerable and for many years it has been prized as the leading liniment for man and beast.

Toads Embedded in Chalk.

Mrs. Marie S. Hagen, of Ropely, raises an interesting, though much discussed, question in the current issue of the Selbourne Magazine. She writes: "Recently I was having some deep holes dug out of the solid chalk in which had recently been a meadow, for the purpose of planting some pillar-roses, and in two of these my gardener found several small toads firmly embedded in the chalk, and one tightly fixed into a large flint. I had often heard of toads being found embedded in a rock, but I never quite believed it. The chalk in question cannot, I think, have been disturbed since it was first laid down upon the floor of some ancient ocean. Can the toads have burrowed so far beneath the surface—and through so hard a substance as solid chalk?"

How to REMOVE SUPERFLUOUS HAIR From the Face, Arms and Neck Told Free. Society women and actresses all over Europe are strongly endorsing a new, marvelous discovery of how to remove superfluous hair from the face, arms and neck. This new discovery is now for the first time introduced into Canada. Any woman afflicted with the growth of superfluous hair can obtain the information free of charge. Send your name and address together with a 2 cent stamp to Madame Fayard, Room 25, St. John's Block, Winnipeg.

Height Of Shooting Stars.

According to "Cosmos," the mean height at which shooting stars first become visible is 81 miles. The mean height of their disappearance is about 58 miles. The mean length of this visible path is 45 miles.

"Who gets the custody of the automobile?"
"I told my wife she might have it. I can't keep up the machine and pay alimony, too."—Louisville Courier-Journal.

When going away from home, or at any change of habitat, he is a wise man who numbers among his belongings a bottle of Dr. J. D. Kellogg's I scerery Cordial. Change of food and water in some strange place where there are no doctors may bring on an attack of dysentery. He then has a standard remedy at hand with which to cope with the disorder, and he can successfully fight the ailment and still live it.

What Polly Wanted.

The McKeesport man was telling the minister about his educated parrot.

"Ask him something," he urged.

"Polly want a cracker?" asked the parson.

"Naw, gimme three cards."

Do not give your family food made with alum baking powder. Use Magic Baking Powder. Cos's no more than the ordinary kind and is guaranteed not to contain alum. All ingredients are plainly printed on each package. See if they are on the brand you are now using. All up-to-date Grocers sell and recommend "Magic."

A Sheet That Couldn't Be Turned.

There is in London a gentleman who has given up several years of his life to a crusade against the ordinary sheet. He has invented a sheet which cannot be turned by the maker of the bed, so that the sleeper is always sure of being between the same surfaces. He holds that very few hotels give to each border a clean pair of sheets, and that the proprietors have an unpleasant habit of turning them, or ironing them, and then calling them clean. "Few people realize," says the inventor, "that an ordinary pair of sheets can be put on a bed in 32 different positions. It is an appalling thought that one may be the thirty-second person to sleep between those sheets."

Get My New portable GRANARY

"SEE how handy my new granary is. You place four or five of them around your quarter section. This saves time in harvest hauling to stacks."

"Then my granaries come in to hold your grain from each stack. My granary keeps grain clean, dry and unheated. No musty grain, no losses from rats or vermin. When ready haul direct to the elevator from the granaries."

"I make several sizes of this handy granary. You can get 150, 200, 300, 400, 500, 600 and 1000 full measure guaranteed Imperial Bushel sizes (not small U.S. bushels) and you set up any Pedlar Granary in half a day. Remember you can move it easily any time. My Granary saves big money by cutting down teaming and keeping the grain right."

"See how the man at the left can shovel grain in from the threshing machine, if it has no leg-spout to deliver grain direct through the manhole on the roof."

The other man is bagging grain. Granaries are had with door-section or plain, as desired. My new Granary is just right for saving cost. It pays for itself in a year. It comes in sections—low freight cost. A boy can set up. Write for my descriptive booklet."

MY FREE TRIAL TREATMENT MAY CURE YOU

Dear Mrs. Currah—I feel so very much better after using the 10 days' treatment of ORANGE LILY you were kind enough to send, that I will not require any more. In fact, I feel entirely well, and it is now a month since I stopped using the treatment.

(Miss) F. W. T.
Similar letters to the above are not infrequent, though, of course, such cases are not of long standing. Most women who have suffered for any length of time will require to use ORANGE LILY longer than the Trial Treatment in order to effect a complete cure, but in every case they will be perceptibly benefited. Further, the benefit will be permanent whether they continue to use ORANGE LILY or not. It is not taken internally, and does not contain any alcohol or other stimulant. It is an applied treatment, and acts directly on the suffering organs. In all cases of women's disorders, these organs are congested to a greater or less extent, and ORANGE LILY will relieve and remove this congestion just as positively and certainly as the action of ammonia or soap on soiled linen. It is a simple chemical problem, and the result is always the same, a step towards better health and complete cure.

In order that every suffering woman may prove its good qualities, I will send enough of ORANGE LILY for 10 days' treatment, absolutely free, to each lady who will send me her address. MRS. FRANCES E. CURRAH, WINDSOR, ONT. 10

WEAR The King Hat
REGISTERED GUARANTEED
A HAT FOR EVERY FACE

The day before she was to be married the old negro servant came to her mistress and entrusted her savings to her keeping.

"Why should I keep it? I thought you were going to get married?" said the mistress.

"So I is, missus; but do you s'pose I'd keep all dis money in the house wid that strange nigger?"

"Hard Drinking Water.

Many persons have long believed that it is injurious to the health to drink "hard" water. Medical authorities now assert that there is no foundation for the belief, and some maintain that hard water is even superior to soft water for drinking purpose. They point out the fact that ordinary food contains a great deal more lime than is to be found in even a larger quantity of water than any one would be likely to drink. Gout is said to occur alike among those who do and those who do not drink hard water. According to the statistics quoted in the Engineer, the death-rate in "hard water towns" is actually less than in "soft water towns." It is also the fact that most of the natural waters, attributed to the drinking of hard water, themselves contain no small proportion of lime salts.

A WOMAN'S GOOD LOOKS

Depend on her general health and freedom from pain. Many a woman looks old before her time because of those irregularities which are essentially feminine. Starting from early womanhood, she suffers from frequently recurring derangements that upset her womanly health. If she be beautiful she grows into that mellow age without wrinkles and crowfoot about the eyes or the blue circles underneath. It is invariably the rule that such women suffer little, or not at all, from womanly derangements which sap the health and leave in the face the tell-tale story of pain and suffering. Dr. R. V. Pierce, the famous specialist in the diseases of women, found a prescription in his early practice that soothed the organism peculiar to womanhood—oiled the machinery, as it were, of the human system—and helped the woman to pass those painful periods that scar-lined and aged her face. This remedy became the well-known Dr. Pierce's Favorite Prescription that has benefited thousands of women and saved them from misery and suffering at different periods in life.

Mrs. HARKLEY E. PIERCE, of 244 Bright Street, Sarnia, Ont., writes: "I am now a well woman after suffering for three years and doctoring with several different doctors, each one saying it was something different, and the last one, after putting me through a thorough examination, said I was suffering from a growth, which, in time, would result in cancer, and said I would not live more than two years if not operated upon right away. I became hopelessly discouraged but would not consent to the operation as I was too weak and too much afraid, but at last, through the advice of a friend, I tried Dr. Pierce's medicine, and after using two bottles of the 'Favorite Prescription' I immediately felt a change. I also used two boxes of 'Healing Suppositories' and eight boxes of 'Lotion Tablets,' and can safely praise the name of Dr. Pierce's medicines to all who suffer from any female disease, for these medicines are all they are claimed to be, and I hope will help others as they have helped me."

Mrs. PIERCE.

What Makes You Tired

So Tired That Even Sleep Fails to Restore.

There Are Poisons in the Blood That Can be Removed by
DR. CHASE'S KIDNEY-LIVER PILLS

You get tired. That is only natural, whether you work with brain or muscle. But when you are not restored by a night's sleep there is something wrong.

The process of living is something like the burning of a fire. When the nerve cells are consumed by the activity of life and work there is left in the system an ash in the form of poisonous waste matter. These poisons in the system cause pain and give rise to feelings of fatigue.

Nothing will so quickly sweep these poisons from the system as Dr. Chase's Kidney-Liver Pills. The liver is quickened in action, the bowels move regularly and the kidneys take on new vigor and activity.

The blood is purified, the waste matter which has been clogging and retarding the organs of digestion is removed. Headaches and backaches disappear, the appetite is sharpened, digestion improves and you feel fine in every way.

A single box of Dr. Chase's Kidney-Liver Pills, at a cost of twenty-five cents, will convince you of the promptness and certainty with which this great medicine cleanses the filtering and excretory organs and restores to health and vigor the whole digestive system. One pill a dose, 25c a box, at all dealers or Edman, Bates & Co., Limited, Toronto.

Not Yet Finished.

During a recent visit to a Southern town a Washington man was much interested in a small dandy who had been told off to administer to his wants.

On morning the stranger opened his eyes to find the diminutive coal black servant standing at his bedside with a tray bearing coffee and rolls.

"Who are you, anyhow?" facetiously demanded the Washingtonian.

The taciturn youngster vouchsafed no reply, but grinned broadly.

"Where were you raised?" next inquired the visitor, with a vague notion that this was an opening question that this was an opening question.

The little dandy grinned again and chuckled.

"I ain't done raised yet, suh!"

Hard To Understand.

"I can't understand why a woman should lie about her age. I should never try to deceive anybody in that way."

"Still, you wouldn't want everybody to know you were 41, would you?"

"Forty-one! The idea! I'll not be 32 till my next birthday."

A Pill that Proves its Value—Those of weak stomach will find strength in Parmelee's Vegetable Pills, because they serve to maintain the healthful action of the stomach and the liver, irregularities in which are most distressing. Dyspeptics are well acquainted with them and value them at their proper worth. They have afforded relief when other preparations have failed, and have effected cures in ailments of long standing where other medicines were found unavailing.

Cheerfully Subscribed.

Mrs. Noopop—"Charlie, what do you think? Dad just sent us a one-thousand-dollar check for our new baby! Wasn't that good of him?"

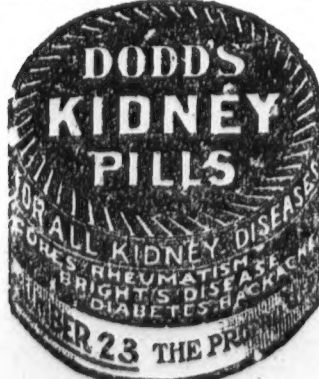

Mr. Noopop—"I should say so! I'll write at once and thank him for his contribution to the Frosh Heir fund."

By Way Of Consolation.

"There is such a thing as overdoing this 'bright side' business," recently observed a crusty old bachelor, "as was evidenced recently in the household of a friend of mine, whose wife has always prided herself on the circumstance that she looks on the bright side."

"The husband, an absent minded sort of a chap, put the lighted end of his cigar in his mouth as he sat reading one evening. Of course, he jumped up and made a dreadful racket for a moment. Then wifey, anxious to live up to her reputation of being nice and cheerful and encouraging, smiled blandly and observed—

"At any rate, dear, it was most fortunate that you discovered it at once!"

THE RAILWAY QUESTION.

Reckless Bonusing of Branch Lines—The Question Carefully Considered.

The present railway situation calls for careful consideration. On the one hand the development of Northwest Canada demands railway facilities, and on the other it is possible that railroads may be constructed in wrong districts and more important localities be neglected. The fact is undeniable that hundreds of miles of branch roads have been and are being constructed that cannot possibly pay the interest on the first cost, to say nothing of the cost of equipment and operation. Look at the parallel lines through the three western provinces. In many places there are three lines where the whole of the traffic obtainable in the district is only sufficient for one. Many of these roads are not ten miles apart, and in several places they are not two.

On examining any good railroad map of Western Canada we find that these parallel lines aggregate hundreds of miles of railway, while there are many thousands of square miles of virgin territory entirely without the railroad facilities they so urgently need and which they must have or the continued development of the country will be seriously checked.

The trouble arises from the facility with which railway charters can be obtained, and the bonusing system. To illustrate: Say half a dozen men of no particular financial standing, meet and decide to get a charter for a railway. They decide on a scheme and ask the government for a charter.

A little lobbying of parliament or legislature and they get all they ask for. They then ask for a bonus and get a bond guarantee for \$13,000.00 a mile. The next step is to organize a construction company among themselves. The bonds are sold, the cash is to hand, and the contracts for construction of the lines are given to the construction company. Maybe John Smith is president of the railway company, and the same John Smith is president of the construction company. So John Smith and the directors of the railway company award the contracts to John Smith and directors of the construction company at their own high figures. In short they contract with themselves, pay themselves out of the proceeds of the sale of the guaranteed bonds, and pocket the profit.

That was the old scheme, but the new one goes it one better—it is to organize a Branch Lines Company, and get a charter and a bond guarantee entirely independent of the trunk line company. They can now reap all the advantages gained by a construction company, but the trunk line company disowns all responsibility. Should the branch lines fail to make good, the trunk line company can refuse to be accountable for its actions, and can leave it to itself for itself. The results may be that the interest on the bonds of the branch lines company is not paid and they will then call on the government to pay it.

Thus the trunk line company will have all the benefit of the traffic they would have got in any case, the branch lines company will pocket all the profits they made on construction, and the people will pay the piper.

Of course this game could only be worked on a railway bonused by guaranteed bonds. It could not be manipulated in constructing branch lines, on a road that paid the entire cost of their construction and operation, without bond guarantee, out of its own treasury.

Is it not time to call a halt in this bonusing business and the indiscriminate giving of charters to railway promoters. The credit of the provinces is not unlimited. Every million dollars worth of bonds guaranteed is a million dollars taken from their borrowing power. The time will come when the limit will be reached and at the rate we are now going it will not take a very long time before that limit will be passed.

There is now a congestion in the transportation of grain. The opening of every branch line increases this congestion. We are told that if production continues to increase as it has increased during the past few years, the railways will not be able to handle more than forty per cent. of the grain crop of 1915 before the close of navigation unless the railways double track their main lines. Is it not time to put an end to this insane bonusing of branch lines until provision is made for sending our immense harvests to the markets of the world.

Minard's Liniment Lumberman's Friend.

"I see your wife has her hand in a bandage. What is the matter?"
"I got a mouse trap and put it in my coat pocket last night."—From Judge.

A Woman's Way.

"My dear," says the bacteriologist's wife, "did you remember to order the coal?"

"Doggone it!" growls the bacteriologist. "Every time I count up to nine hundred and eighty-five thousand three hundred and forty-five germs in this spoonful of milk, she comes and interrupts me and makes me lose the count!"

Closing the door with a slam, he begins again, "One, two, three," etc.

There was a deficit of nearly £1,000,000 on the working of the P.O. telegraphs and telephones for 1910-11.

LET MOONEY DO IT

THE BUGABOO OF BAKE DAY

MAKES LIFE DREARY IN MANY A HOME

The great bulk of home baking is no longer necessary. "Let MOONEY do it." MOONEY'S BISCUITS are made right at your own door and are on your grocer's shelves as fresh as they leave the oven.

They are the only biscuit which comes to your table fresh enough to take the place of your own home baking.

MOONEY'S PERFECTION SODA BISCUITS

are sold in air-tight packages—or sealed tins. If you have never used them you have a delightful treat in store.

MOONEY'S are made in Winnipeg, a Western biscuit for Western people.

THE RIGHT WAY

In all cases of DISTEMPER, PINK EYE, INFLUENZA, COLDS, ETC.

of all horses, broodmares, colts, stallions, is to

"SPOHN THEM"

on their tongues or in the feed put Spohn's Liquid Compound. Give the remedy to all of them. It acts on the blood and glands. It routes the disease by expelling the disease germs. It wards off the trouble no matter how they are "exposed." Absolutely free from anything injurious. A child can safely take it. 50c and \$1.00; \$5.50 and \$11.00 the dozen. Sold by druggists and harness dealers.

SPRING BLOOD IS WATERY BLOOD

How to Get New Health and New Strength at This Season.

Spring ailments are not imaginary. Even the most robust find the winter months most trying to their health. Confinement indoors, often in overheated and nearly always badly ventilated rooms—in the home, the office, the shop, and the school, taxes the vitality of even the strongest. The blood becomes thin and watery and is clogged with impurities. Some people have headaches and a feeling of languor. Others are low-spirited and nervous. Still others are troubled with disfiguring pimples and skin eruptions, while some get up in the morning feeling just as tired as when they went to bed. These are all spring symptoms that the blood is out of order and that a medicine is needed. Many people take purgative medicines in the spring. This is a serious mistake. You cannot cure yourself with a medicine that gallops through your system and leaves you weaker still. This is all that a purgative does. What you need to give you health and strength in the spring is a tonic medicine that will enrich the blood and soothe the tangled nerves. And the one always reliable tonic and blood builder is Dr. Williams' Pink Pills. These pills not only banish spring weakness but guard you against the more serious ailments that follow, such as anaemia, nervous debility, indigestion, rheumatism, and other diseases due to bad blood. In proof of this Mrs. Emma Duck, Carleton Place, Ont., says: "I was greatly troubled with weak spells, dizziness and extreme nervousness, and did not find anything to help me until acting on the advice of an aunt I began the use of Dr. Williams' Pink Pills."

Using five boxes I found my health fully restored, and cheerfully recommend the pills to others."

If you are ailing this spring you cannot afford, in your own interests to overlook so valuable a medicine as Dr. Williams' Pink Pills. Sold by all medicine dealers or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

One pit pony which was brought up from a mine at the beginning of the coal-strike had not seen daylight for twenty-two years.

Stocking Canadian Waters.

Hatching fish by artificial means to stock the waters of Canada is engaged in on a large scale by the Dominion Government. In 1909 the Dominion fish hatcheries planted no fewer than 1,024,282,000 fry in various waters throughout the country. Of the 37 hatcheries now in operation, British Columbia and Quebec have eight each, Nova Scotia and New Brunswick, and Ontario have five each, and Manitoba and Prince Edward Island each have three.

BEST AND HEALTH TO MOTHER AND CHILD.

Mrs. Winslow's SOOTHING SYRUP has been used for over SIXTY YEARS by MILLIONS of MOTHERS for their CHILDREN WHILE TEETHING, with PERFECT SUCCESS. IT SOOTHES the CHILD, SOFTENS the GUMS, ALLAYS all PAIN; CURES WIND COLIC, and is the best remedy for DIARRHOEA. It is absolutely harmless. Be sure and ask for "Mrs. Winslow's Soothing Syrup," and take no other kind. Twenty-five cents a bottle.

LIBERAL PLAN IS ADOPTED FOR COLONIZATION OF C.P.R. LANDS

Natural Resources Department of C.P.R. has Adopted a Far Reaching Scheme to Encourage Settlement of Western Lands.

Montreal.—One of the first results of the creation of the natural resources department of the C.P.R. is the announcement in the adoption of a far-reaching scheme for the colonization of the company's land in Manitoba, Saskatchewan and Alberta.

The most striking innovation in this scheme is that the C.P.R. will loan to each selected colonist a sum of \$2000 for a period of ten years at 6 per cent. per annum for use in the development of his farm.

There are, of course, restrictive conditions attached to the loans, but there is not the slightest doubt that the enterprise will be largely taken advantage of, and that the result will be one of the most remarkable movements ever inaugurated in connection with land colonization.

The conditions drawn up are that applicants should be married men actually engaged in farming on a rented farm. These will be required to own, free of encumbrance, sufficient furniture, horses, cows and other live stock to enable them to go into im-

mediate occupation of their farms in western Canada. Thus it will be seen that the scheme has largely been drawn up to meet the requirements of farmers now renting land in the middle states of America.

The applicants will be required to have sufficient capital to make their first payment of one-tenth on the land purchased and to cover the cost of upkeep of their families for one year. They will also be required to personally visit the west and select their own farms.

The full amount of the \$2000 loan is to be added to the purchase price of the farm and repaid annually in instalments on principal and interest. The amount of the loan was to be expended on the following improvements:

The erection of a house from one of the standard plans of houses erected by the company on its ready-made farms; the erection of a barn from one of the standard plans; the fencing of the farm; the provision of a well and pump, and the cultivation and cropping of at least fifty acres.

BANNER YEAR IN ALBERTA.

Fast Becoming Difficult to Get Homesteads Though Still Land for Sale.

Winnipeg.—Hon. Arthur L. Sifton, Premier of Alberta, back from the East, feels quite jubilant over the prospects in Alberta this year. Spring opened up early and was finer than has been known for twenty years. Seeding started early and has been proceeding under favorable conditions. Larger acreage than ever before has been planted, and so far as can be guessed in advance prospects are favorable for banner crops.

Settlers for both farms and towns are crowding in at an unprecedented rate. It is fast becoming difficult to get homesteads in the south, though land for sale is still plentiful. The rush, however, is to Grande Prairie and the Peace River Valley, which have received widespread attention of late and are apparently to be the favorite points this year for the great bulk of the newcomers.

This will also be a banner year for Alberta in regard to railway work. The Canadian Pacific are building a branch east from Lethbridge and one south from Suffield, through the irrigated lands of the South Alberta Company, and efforts will be made by this company to have the same continued as far as Kipp, in order to assist settlers in between who have been raising large crops for some time.

The C.P.R. have been strongly urged to start this line from both ends, so as to ensure for this fall the much needed outlet for a large district contiguous to their lines but too far for profitable hauling.

The Grand Trunk Pacific now have a gang of men completing the Tofield to Calgary line, and has promised steel for the same for delivery upon the opening of navigation. That line is accordingly assured to Calgary this season.

The Edmonton, Dunvegan and British Columbia Railroad has secured all necessary money and has purchased steel for the season's work. They will start construction before May 1, and laying of the steel as soon as navigation opens.

SPEND SUMMER IN TRAVEL.

Connaughts Will See Canada from Charlton to Prince Rupert in Six Month's Trip.

Ottawa.—The itinerary of the Duke of Connaught for the coming summer has been prepared.

They all spend the week of May 26 in Montreal; May 16 they arrive in Toronto, and May 29th and 30th will visit London and Guelph.

They will leave for Montreal on May 31st. June 2 to 17 will be spent in Quebec after which their Royal Highnesses will spend two weeks on the Tobique River fishing. They will arrive about July 7 at Winnipeg for the opening of the exhibition, returning towards the end of the month to the east.

They will leave Montreal by steamer for the Maritime Provinces on August 1, visiting Gaspe, Summerside, Charlottetown, Picton, Hawkesbury, Sydney, Halifax, Truro, Windsor, St. John, Fredericton and other places.

He will open the Toronto exhibition on the last day of August, after which their Royal Highnesses will leave for the west, visiting Sault Ste Marie, Sudbury, Port Arthur, and Fort William.

Leaving Winnipeg on September 1, their Highnesses will visit Saskatoon, and Prince Albert on September 3 and 4, reaching Calgary on the 5th. After two days' stay of Calgary, it is probable that their Royal Highnesses will open the new irrigation works of the Southern Alberta Land Company south of Strathmore.

The plans for the next few days are indefinite, but it is probable that their Royal Highnesses will leave Calgary about September 17, stopping a few hours at Kamloops.

They will reach Vancouver on September 19, stopping there till the 23rd and paying a visit to New Westminster. They will leave for Prince Rupert on the 24th for a four days' visit.

They leave Vancouver on October 2, visiting Vernon and the Okanagan valley via the main line to Revelstoke, and thence to Arrow Head.

Passing through Robson and Nelson their Royal Highnesses will retain the special train, across to Macleod and Lethbridge where they will probably stay from October 8 to 10. Then, Indian Head and Brandon, their Royal Highnesses will arrive at Poplar Point about October 15 and go for a few days shooting on Lake Manitoba, returning to Ottawa just before the end of October.

SERIOUS CANTON DISORDERS.

Thousands of Soldiers Returned in State of Discontent.

Peking, China.—There are entertained of further serious disorders in Canton. Thousands of soldiers have returned from the north in a state of discontent and have been disbanded. The governor and general in command have been impeached for the execution of a Chinese editor. The provincial assembly and republicans condemn the arbitrary action. Several officials have resigned because the governor has been appointing his clansmen to office. The West River is being stirred to keep off strikes.

Addition to Ontario Named.

Toronto, Ont.—The new territory added to the Province of Ontario by division of Kewatin will be named Patricia district out of compliment to Connaught.

THE MARKET REPORT.

Weekly Grain Letter Supplied By Thompson, Sons & Co., Grain Merchants, Winnipeg.

Wheat.—During the past week the wheat markets have been rather mixed in the course they have run. The immense damage to the winter wheat crop in several important sections in the United States has affected with great emphasis the Chicago market, especially in the May future in that market, while Minneapolis and Duluth have to a large extent shown indifference to the damage reports. The present condition of and the prospects for the outcome of the United States winter wheat crop are of very great importance in their bearing on prices of wheat for the balance of the present crop year. There is unfortunately no doubt now that an unusually large percentage of the crop sown in the states of Illinois, Missouri, Indiana and Ohio has been or is being plowed up, and will be planted with oats and corn. In the further west states, Nebraska, Kansas, and Oklahoma there is also some damage, but probably not more than usual, but over the whole winter wheat area the crop experts are beginning to estimate the acreage to be plowed up at 4,000,000 acres. As the winter wheat area planted last fall was estimated to be 2,000,000 acres less than it was the previous year, it can be imagined that the production of winter wheat in the United States in 1912 will be the smallest in recent years, for besides the acreage actually abandoned, there is sure to be a great deal left to grow that is so much winter killed as to give only a small yield. A low condition of the crop in April suggests further deterioration in May and June, for as a friend of ours puts it, "the history of other damage years indicates that a crop which starts with trouble will continue in trouble." Outside of this serious crop damage there is less clear and definite evidence of a bullish situation, than there was some weeks ago, because the statistical position has continued to grow more bearish. In the United States the visible supply, although it had a decrease of 1,807,000 bus. last week, still stands as high as 47,960,000 bus., compared with about 33,409,000 bus. last year. The quantity on ocean passage has been increasing steadily, and is now 54,024,000 bus. against 59,616,000 bus. a year ago. The European visible supply last week increased 1,684,000 bus., against a decrease of 1,200,000 bus. same week last year, and it now stands at 90,124,000 bus., against 112,100,000 bus. last year, a difference of 21,976,000 bus. short of last year's quantity, while only four weeks ago the shortage compared with same date last year was 35,500,000 bus. These statistics don't seem to favor the idea of scarcity of wheat or higher prices for it, especially as prices at present are from 10c to 22c higher than they were a year ago. Nevertheless there is the sentiment that the situation is bullish. The visible supply in the United States is decreasing faster than it did a year ago, and there is a well-known shortage in Russia, Argentina and Australia, which will prevent in the next three months such large weekly world's shipments as took place a year ago. The conditions surrounding the growing crops other than the United States winter wheat, are generally favorable. At the present time every country in Europe can give a fair account of its growing crop. In the spring wheat country of the United States and Western Canada the seeding of the new crop has been started and is proceeding under normally favorable conditions. In Southern Minnesota and South Dakota wheat seeding is well advanced. Further north the season is somewhat later. The subsoil is well supplied with moisture this year and there is nothing to mar a fair prospect at present.

Barley.—The United States visible supply, although it had a decrease of 1,807,000 bus. last week, still stands as high as 47,960,000 bus., compared with about 33,409,000 bus. last year. Barley.—The United States visible supply, although it had a decrease of 1,807,000 bus. last week, still stands as high as 47,960,000 bus., compared with about 33,409,000 bus. last year. The quantity on ocean passage has been increasing steadily, and is now 54,024,000 bus. against 59,616,000 bus. a year ago. The European visible supply last week increased 1,684,000 bus., against a decrease of 1,200,000 bus. same week last year, and it now stands at 90,124,000 bus., against 112,100,000 bus. last year, a difference of 21,976,000 bus. short of last year's quantity, while only four weeks ago the shortage compared with same date last year was 35,500,000 bus. These statistics don't seem to favor the idea of scarcity of wheat or higher prices for it, especially as prices at present are from 10c to 22c higher than they were a year ago. Nevertheless there is the sentiment that the situation is bullish. The visible supply in the United States is decreasing faster than it did a year ago, and there is a well-known shortage in Russia, Argentina and Australia, which will prevent in the next three months such large weekly world's shipments as took place a year ago. The conditions surrounding the growing crops other than the United States winter wheat, are generally favorable. At the present time every country in Europe can give a fair account of its growing crop. In the spring wheat country of the United States and Western Canada the seeding of the new crop has been started and is proceeding under normally favorable conditions. In Southern Minnesota and South Dakota wheat seeding is well advanced. Further north the season is somewhat later. The subsoil is well supplied with moisture this year and there is nothing to mar a fair prospect at present.

Flags and fire works at Perrins.

Mr. H. McKim, former editor of the Bowden News left here on Sunday's evening train for Calgary where he has secured a position on the staff of the Herald Western. The many citizens of Bowden wish him all kinds of success.

Messrs. Gable and Huget began plastering operations of the interior of Richardson's house west of town this week.

The Crown Lumber Co received a consignment of lumber on Wednesday, for the spring building Leslie Bernard is now busy hauling the same.

Miss Jessie Shenfield is taking music lessons at Red Deer, where she is preparing for the Toronto Conservatory of music. Miss Shenfield arrived home, from Red Deer on Wednesday's 7.30 train.

S. L. Tanbe of the Tanbe Optical Co., Calgary will be at the Bowden Drug Store on Friday May 17th., forenoon only. If you have any trouble with your eyes make it a point to consult him.

Mr. M. E. Parsons, a real estate man of Calgary was in our town and district on Wednesday selling Saskatoon lots. At the present we do not know what amount of business he transacted during his short stay in our village. As a rule in most towns, an outsider coming into a place and selling property of this description is generally taxed by the Council. We cannot say whether or not he was.

Gopher poison,—Perrins

Mr. Leese, the new presbyterian Minister preached his first Sermon in the presbyterian church on Sunday last. He came here on Saturday from the Alberta college and will remain in Bowden during the summer months.

We notice that on Saturday the 4th inst. Mr. H. Armitstead, the Bowden School principal, had a illustrated article in the Montreal Star. The article which was specially featured is a most interesting one. We consider this one of the best articles ever attempted by him, and will no doubt be publishing the same in a later edition of our weekly paper.

Formaldehyde for smut, fresh and strong.—Perrins drug store.

Mrs. Sanderman and daughter of Didsbury, visited friends in our village on Sunday last.

Since publishing our last weeks issue nothing has been done in regards to tree planting. This we think would be one of the necessities for the beautifying of our village, as well as the citizens own property.

85 per cent of all headaches are the result of eye-strain. Are you troubled that way? If so see S. L. Tanbe of the Tanbe Optical Co. Calgary, he will be at the Bowden Drug Store, on Friday May 17th up to 1 p. m.

It pays to patronize your own town. Therefore get your letter-heads, bill-heads, envelopes, stationery, posters, etc. printed right at the Bowden News. Charges moderate.
